

SAI SRUJAN SEELAM

saisrujanseelam2002@gmail.com · linkedin.com/in/sai-srujan-seelam · github.com/saisrujanseelam · Portfolio · Richmond, VA

PROFESSIONAL SUMMARY

AI/ML Engineer building production-ready LLM applications, RAG pipelines, and agentic workflows across internships, research, and client deliveries. Focused on shipping secure, compliant AI systems: prompt-injection and prompt-leakage guardrails, tenant isolation, and HIPAA-aware handling of healthcare (EHR) data. Proficient in Python, LangChain, LangGraph, Hugging Face, and vector databases (FAISS, pgvector, Pinecone) on Azure and AWS, shipping end-to-end from fine-tuning through hardened, production-grade REST API deployment.

TECHNICAL SKILLS

LLM & NLP Transformers, PEFT/LoRA, Fine-Tuning, Prompt Engineering, RAG, Agentic AI & Multi-Model Orchestration, MCP, LLM Evaluation & Observability (LangSmith, Ragas)

Security & Compliance AI Guardrails (Prompt-Injection & Prompt-Leakage Defense), HIPAA-Aware Data Handling, JWT Auth, SHA-256 API-Key Hashing, Tenant Isolation, Rate Limiting, Secure REST APIs, Production-Ready & Tested Code

Embeddings & Search Sentence Transformers, FAISS, Pinecone, Chroma, pgvector, Semantic & Hybrid Search, Azure AI Search

ML, Data & Cloud PyTorch, TensorFlow, Scikit-learn, ETL, Snowflake, PostgreSQL, Redis, Azure (OpenAI, Functions), AWS, Docker, Kubernetes, CI/CD

Dev Python, SQL, TypeScript, FastAPI, Flask, React, Next.js, REST APIs, Git, Multi-Tenant Architecture

PROFESSIONAL EXPERIENCE

AI Engineer Intern | WonderAvenues LLC

Feb 2026 – Apr 2026

- Developed and deployed production AI chatbots for client websites using LangChain, OpenAI, and RAG pipelines with tenant-isolated pgvector knowledge bases, serving 5+ business verticals.
- Redesigned and rebuilt the Oakton Foot & Ankle website (oaktonfootankle.com) in Figma and Webflow with Claude Code; the on-page SEO and headless-CMS blog funnel I set up grew monthly visitors from 180 to about 5,600, most of it direct organic search.
- Built a custom single-page site for Solo Levitated Fitness (soloislevitated.com) to the owner's brand spec and shipped an AI auto-booking engine that syncs to his Google Calendar, taking appointments from both the site and his Gmail inbox.
- Implemented prompt engineering frameworks and LLM evaluation pipelines with Ragas and LangSmith, reducing hallucination rates across production deployments by 35%.
- Built agentic workflows integrated with enterprise CRM and EHR APIs using Python and Azure cloud services with HIPAA-aware data handling, reducing manual processing overhead by 45%.

ML Engineer | DeltaCubes

Dec 2023 – Dec 2024

- Designed and trained NLP models for text classification and entity recognition using Hugging Face Transformers and BERT fine-tuning, improving task accuracy by 22% over rule-based baselines.
- Built semantic search pipelines using sentence transformer embeddings and FAISS vector indexing, enabling sub-100ms similarity retrieval across 500K+ document corpora.
- Optimized embedding workflows (chunking strategies, embedding generation, and vector store management), reducing retrieval latency by 30% in production.

KEY PROJECTS

Multi-Tenant AI Chatbot SaaS Platform | FastAPI, Claude, pgvector, Voyage AI, Next.js, Redis, Docker

Jan 2026 – May 2026

github.com/saisrujanseelam/AI-chatbot-SaaS

- Architected a self-hostable, multi-tenant chatbot platform with per-tenant RAG pipelines (scrape → semantic chunking → Voyage AI embeddings → pgvector/HNSW retrieval → Claude), embeddable on any website (WordPress, Wix, Shopify, Webflow) through a single Shadow-DOM script tag.
- Enforced query-level tenant isolation via JWT auth and SHA-256-hashed API keys, added prompt-injection and prompt-leakage guardrails with Redis rate limiting, and shipped a Next.js client portal (47 API routes) for lead management, a conversation inbox, and funnel/ROI analytics.

AI Consensus Personal Trainer | Multi-LLM Consensus, Perplexity, Gemini, Claude, MCP, Streamlit, Supabase

Sep 2025 – Dec 2025

github.com/saisrujanseelam/AI-multi-agentic-consensus-fitness-trainer

- Built a consensus coaching engine that routes each query through three LLMs (Perplexity, Gemini, Claude) via MCP servers and cross-validates their answers, attaching confidence scores, cited research links, and a safety auto-flagging layer to every recommendation; RAG over exercise, nutrition, and recovery knowledge bases with Supabase-backed progress tracking.

Morphologically-Aware Adapters | Hindi-English Code-Switched POS Tagging, HingRoBERTa, PEFT, Stanza, spaCy

2025

github.com/saisrujanseelam/Cross-Script-Attention-for-Hindi-English-Code-Switching

- Augmented a frozen HingRoBERTa encoder with bottleneck adapters and explicit gender/number/case morphology embeddings (extracted via Stanza and spaCy), training only 0.08% of parameters to reach 94.21% accuracy on COMI-LINGUA, +8.21 points over the frozen baseline.

Drug Recommendation NLP Engine | Hugging Face MiniLM, FAISS, Flask, REST API

2025

github.com/saisrujanseelam/drug-recommendation-system

- Led a 4-person team building a transformer-based drug-recommendation REST API (MiniLM sentence-transformers + FAISS cosine retrieval over a medical knowledge base, Flask), beating a TF-IDF baseline on every retrieval metric (Recall@1 0.95 vs 0.90, MRR 0.97 vs 0.94).

EDUCATION

M.S. Computer Science | Virginia Commonwealth University, Richmond, VA

May 2026

Coursework: Advanced NLP, Machine Learning, Deep Learning, Cloud Computing, Distributed Systems

B.Tech Computer Science & Engineering | Amrita School of Engineering, Bengaluru

June 2024

CERTIFICATIONS

AWS Solutions Architect (In Progress) • LangChain Certified Developer (In Progress) • MATLAB Certified Associate • Advanced ML & Deep Learning • Data Science Professional
